

BDIAP Bursary Report – Ghent Pathology 2025

I had the privilege of attending the Ghent Pathology 2025 Conference, held from 24–26 June 2025 at the ICC in Ghent, Belgium, as a recipient of the BDIAP bursary. This conference was a joint meeting of the British Division of the International Academy of Pathology (BDIAP), the Pathological Society of Great Britain and Ireland, and the Belgian Society of Pathology.

Poster Presentation

During the meeting, I had the opportunity to present my poster, which allowed me to share my work with leading experts in pathology, engage in discussions, and receive valuable feedback. Presenting at such a prestigious conference enhanced my communication skills and helped me gain insights for future research directions.

Key Learnings and Benefits

Attending Ghent Pathology 2025 provided me with exposure to cutting-edge developments in pathology, including updates on molecular diagnostics, digital pathology, and innovations in cancer research. The plenary sessions were highly informative, and I was able to connect with experienced pathologists and fellow trainees from across Europe.

The experience has broadened my understanding of current research trends and best practices in diagnostic pathology, which I aim to incorporate into my clinical and research work.

Acknowledgement

I would like to express my sincere gratitude to the BDIAP for awarding me this bursary, which enabled my attendance at Ghent Pathology 2025. This opportunity has been instrumental in my professional growth and has motivated me to continue contributing to the field of pathology.
