

My name is Stefan Rusu, I am a second-year pathology trainee in Brussels, at Université Libre de Bruxelles.

I had the honour to participate at the congress and I would summarize the experience as fantastic. Despite the short moments of maintenance and the lack of head-to-head conversations, I was still able to enjoy the congress' experience.

Moreover, the materials and presentations being available for longer time, allowed me to check some of them even after the congress.

Stefan Rusu
